Professional summary

Full Stack Developer with over 2 years of experience in the analysis, development, deployment and maintenance of a mission-critical ERP for pharmaceutical inventory and medication dispensing at Offimedicas S.A., a healthcare company. I turn user requirements into deliverables that meet the defined scope, focused on deadlines and on supporting the company's processes.

I built the Claims and Returns (Glosas y Devoluciones) module and its integration with the SIIFA API, so I know healthcare billing and claims management first-hand. I have solid SQL skills on MariaDB, a foundation in C# and object-oriented architecture, and I work with component frameworks such as React and Vue.js, which makes it easy for me to adapt to Angular and the .NET ecosystem.

I consistently apply SOLID principles, Clean Code and design patterns (MVC, Service Layer, Repository). My background as an instructor adds technical communication, documentation and collaborative work in agile teams.

Professional experience

Full Stack Developer

May 2024 – Present

Offimedicas S.A. · Bucaramanga, Colombia

- Analysis, development, deployment and maintenance of **Mesmeric**, Offimedicas' mission-critical ERP for pharmaceutical inventory and medication dispensing. I work on the legacy PHP/Symfony system (Twig, CSS, JavaScript and jQuery) while progressively introducing Go, PHP (Swoole) and Bun for asynchronous processing.
- Built the **Claims and Returns** module and its integration with the **SIIFA** REST API (Colombian Ministry of Health/SISPRO): JWT authentication, claim lookup and synchronization, single and bulk responses, acceptance or rejection handling and full traceability of every operation, using a layered architecture and the Strategy pattern.
- Designed a **bulk export service** with C and Bun FFI that turns 1,000,000 records into Excel in under 1 minute and generates bulk PDFs, processes that were not viable in PHP due to timeouts.
- Wrote and optimized SQL queries on MariaDB (with DBeaver), including stored procedures and replacing correlated subqueries with materialized JOINs to speed up high-volume billing reports.
- Built, consumed and maintained RESTful APIs to integrate with e-invoicing platforms, payment gateways and third-party supplier systems, ensuring interoperability across ERP modules.
- Refactored legacy modules applying SOLID, Clean Code and the MVC, Service Layer and Repository patterns, reducing technical debt and making the system easier to support and evolve.
- Developed dynamic interfaces with Twig, JavaScript and jQuery on an MVC/MVVM architecture for order and inventory tracking dashboards, plus a React Native mobile app for field delivery management.
- Brought AI tools (GitHub Copilot, Claude, Antigravity CLI) into the development workflow to speed up refactoring, test generation and technical documentation.

Computer Science and Technology Instructor focused on Web Development

February 2016 – February 2024

Ministry of Education · Montería, Colombia

- Trained **more than 1,000 students** in web development and applied programming, strengthening technical communication, synthesis and knowledge transfer skills.
- Led collaborative projects with agile methodologies (Scrum/Kanban), building teamwork, mentoring and the ability to adapt to multidisciplinary environments.
- Created technical teaching materials, a skill I now apply to process documentation and team support.

Tech stack

DATABASES

SQL (MariaDB, MySQL) · Stored procedures · Query optimization · Relational design · DBeaver

BACKEND

C# · PHP · Symfony · Twig · Laravel · Go · PHP (Swoole) · C and Bun FFI · RESTful APIs (SIIFA, JWT) · SOLID · Clean Code · Repository · Service Layer · DDD · Hexagonal Architecture

FRONTEND

JavaScript (ES6+) · jQuery · React · React Native · Vue.js · MVC/MVVM · HTML5 · CSS3 · SASS · Bootstrap · Responsive design

TOOLS

Git · GitHub · GitHub Copilot · Claude (Anthropic) · Antigravity CLI · Scrum / Kanban

Education

Bachelor's Degree in Computer Science and Audiovisual Media

Universidad de Córdoba · Montería, Colombia

2011 – 2015

Certifications

Introduction to AI-Assisted Development · Big School — 2026

Vue.js: From Zero to Expert · Udemy — 2022

JavaScript Algorithms and Data Structures · freeCodeCamp — 2022

Responsive Web Design · freeCodeCamp — 2021

JavaScript ES5 · Udemy — 2021

More about me

Healthcare domain

Pharmaceutical inventory, medication dispensing, billing, claims and returns, and SIIFA (Ministry of Health) integration.

Soft skills

User communication, support and guidance, documentation, teamwork and adaptability.

Languages

Spanish (native) · English (intermediate).
